

Tooling Guarantee

- **At Burnex your satisfaction is GUARANTEED.** Every die is designed, machined and assembled with the highest quality material and craftsmanship, regardless of the projected annual quantities. We believe that this commitment to excellence provides our customers with consistent quality year after year.
- **TOOL LIFE** Every die built by Burnex has a 100% assurance for maintenance and repair for the life of the part or as long as Burnex is responsible for production.
- **TOOL AMORTIZATION** In certain instances, 33% of the total die charges can be amortized over the first year of production, enabling our customers to remain competitive and maintain their domestic market share in an international business environment
- **TOOL TRANSFER** We treat every die as if it were our own. After a thorough inspection, the dies receive modification and maintenance it requires prior to production. After sample approval, we continue maintenance as if we built the die from scratch. In certain circumstances, there will be cost associated with out modification that will be quieted prior to work commencement.
- **NEW TOOL DESIGN** We encourage your input. Before we start, share with us everything you know about the part, Everything you like, all the critical areas and mod importantly the trouble spots. The more we know before we begin will provide our customers with years of trouble free production.
